

# SmartLook

## Supervisory software

SmartLook is a software package for the centralized supervision and management of INIM's fire detection and intrusion control systems. It offers a vast application spectrum. Its modularity makes it ideal for industrial, commercial and even small residential applications. A typical application is the centralized supervision of several installations located in different buildings or even different places. Other classic applications are hotel receptions, congress centres, shopping malls and all places where the constant supervision of a fire/security system requires operators to provide prompt response to alarm events. Its flexibility allows it to supervise analogue addressable control panels from the SmartLoop series, and conventional panels from the SmartLine series. The true potential of SmartLook can be seen when it is applied to the management of data coming from installations which are geographically apart from each other thus centralizing the management of a distributed system in a single workstation. The SmartLook software, thanks to its user-friendly interface, also plays an important role in home automation when it is applied to the management of a SmartLiving intrusion-control panel. The latter can be managed in the same installation as fire detection panels from the SmartLoop and SmartLine series.

The SmartLook supervisory software uses graphic maps connected together in a 'tree' structure. Each map accepts an arbitrary number of objects. The objects can be supervised elements (detectors, partitions, zones, outputs, etc.), a connection to another map, a connection to a web page (VCR web interface) or a command button with access level control. The operator can interact with the system in real-time. In this way, it is possible to control the status of the inputs, activate the outputs and implement operations such as: arm, disarm, bypass, output activation, etc. The SmartLook software integrates video capabilities and consents to the incorporation of cameras and DVRs with IP network web interfaces.

The SmartLook software is capable of importing the system configuration by reading it directly on the control panel, or importing it from the database of the SmartLeague software thus reducing programming time considerably. The system provides uncomplicated self-diagnosis functions which allow the operator to verify the status of communication between the software and control panels. It is also capable of managing different access levels.

The SmartLook software comprises two separate applications. One which allows the installer to configure the system and the other, dedicated to the user, which provides all the necessary supervisory functions.

Minimum hardware requirements	- Pentium 4 processor (3.2 GHz) - RAM 2 GB - Sound board
Operative system superior	- Windows* 2000 Professional with Microsoft Data Access Component (MDAC) 2.8 or - Windows* XP, XP64 - Windows* Vista, Vista 64 - Windows* Seven, Seven 64 - Windows* 8 (32 and 64 bit), 8.1 (32 and 64 bit) - Windows* 10 (32 and 64 bit)
Necessary disk space	500 MB
Maximum number of supervised control panels	25
Supervision Interface	RS232, Ethernet
Access levels	Standard User, Supervisor User, Administrator User
Supported video resolutions	800x600, 960x600, 1024x600, 1024x640, 1024x768, 1152x964, 1280x720, 1280x768, 1280x800, 1280x960, 1280x1024

### ORDER CODES

**SmartLook/F01L:** fire Licence – Licence for the management of one SmartLoop or SmartLine fire detection control panel. Non-Expandable.

**SmartLook/F01E:** licence for the management of one SmartLoop or SmartLine fire detection control panel. Expandable Licence.

**SmartLook/F02E:** licence for the management of two SmartLoop or SmartLine fire detection control panels. Expandable Licence.

**SmartLook/F05E:** licence for the management of five SmartLoop or SmartLine fire detection control panels. Expandable Licence.

**SmartLook/F10E:** licence for the management of ten SmartLoop or SmartLine fire detection control panels. Expandable Licence.

**SmartLook/I01L:** "lite" Intrusion Licence – Licence for the management of one SmartLiving intrusion control panel. Non-Expandable Licence.

**SmartLook/I01E:** licence for the management of one SmartLiving intrusion control panel. Expandable Licence.

**SmartLook/I02E:** licence for the management of two SmartLiving intrusion control panels. Expandable Licence.

**SmartLook/I05E:** licence for the management of five SmartLiving intrusion control panels. Expandable Licence.

**SmartLook/I10E:** licence for the management of 10 SmartLiving intrusion control panels. Expandable Licence.
